## An internship project

- Arcadia Ticketing is a cinema ticketing web application that helps users search for movies by name, release date, city, and cinema.
- Has a responsive web design.
- Utilized jQuery for user validation, storing and displaying data.
- Languages: HTML, CSS, JavaScript
- Toolkit: FontAwesome
- Frameworks: Bootstrap

For better view, please visit [here](#).

**NOW PLAYING**

Love and Monsters	Tenet	Unhinged	Monster Hunter	Honest Thief
PG-13		R	PG-13	PG-13

**UPCOMING**

Raya and the Last Dragon	Dune	Black Widow	The Suicide Squad	No Time to Die

**NOW PLAYING**

**UPCOMING**

- Now Playing and Upcoming are the two main sections that decorate the landing page. They are also accessible via navigation bar.
- The upcoming movies are not rated yet unlike the ones that are currently playing.

**SYNOPSIS**

Behind our world, there is another -- a world of dangerous and powerful monsters that rule their domain with deadly ferocity. When Lt. Artemis and her loyal soldiers are transported from our world to the new one, the unflappable lieutenant receives the shock of her life. In a desperate battle for survival against enormous enemies with incredible powers and unstoppable, terrifying attacks, Artemis teams up with a mysterious hunter who has found a way to fight back.

**GENRE**  
Adventure, Action, Fantasy

**DURATION**  
1h 43m

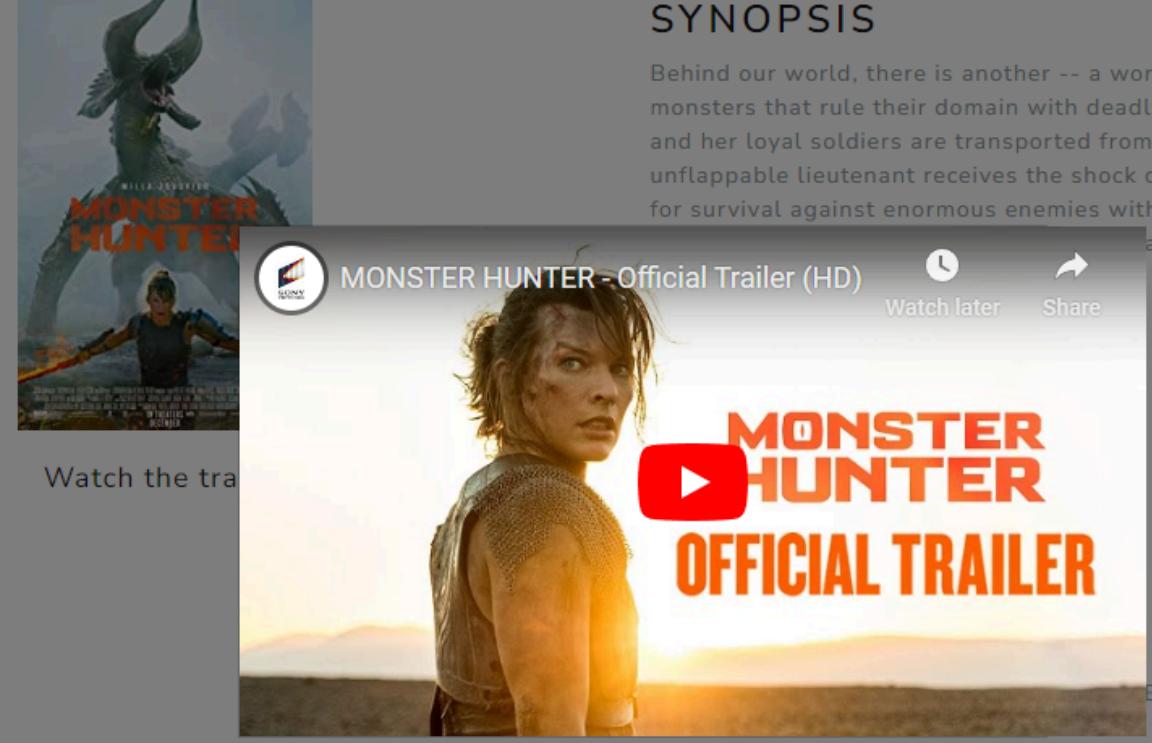

**DIRECTOR**  
Paul W. S. Anderson

**PRODUCERS**  
Jeremy Bolt, Paul W. S. Anderson, Dennis Berardi, Robert Kulzer, Martin Moszkowicz

**SCREENPLAY**  
Paul W. S. Anderson

**CAST**  
Milla Jovovich, Ron Perlman, Tony Jaa, Diego Boneta

[BOOK A TICKET](#)

- Clicking a movie thumbnail would redirect users to another page where they could see information, watch the trailer, and book a ticket.
- Booking a ticket is a feature that only exists on currently playing movies.

Upcoming movie pages also provide trailers and key information despite not having the feature to book a ticket.

The screenshot shows the 'THEATERS' section of the Arcadia Ticketing website. At the top, there's a navigation bar with 'ARCADIA TICKETING' and icons for search, user profile, and cart. Below the navigation, the word 'THEATERS' is centered in a large, bold, dark red font. The main content area is divided into three sections: 'XXI', 'CGV', and 'FLIX CINEMA'. Each section contains a heading, a 'Locations:' section listing areas like Central Jakarta, North Jakarta, West Jakarta, South Jakarta, Tangerang, Bekasi, and Bogor, and a 'Now Playing:' section listing movies such as 'Tenet', 'Honest Thief', 'Monster Hunter', 'Tenet', and 'Unhinged'. To the right of the theater sections is a red rectangular call-to-action box with white text. It says 'SUSCRIBE TO GET INFORMED ABOUT OUR LATEST PROMO!' at the top, followed by a input field for 'Your email address', and a large red 'SUBSCRIBE' button at the bottom.

SEARCH FOR MOVIES

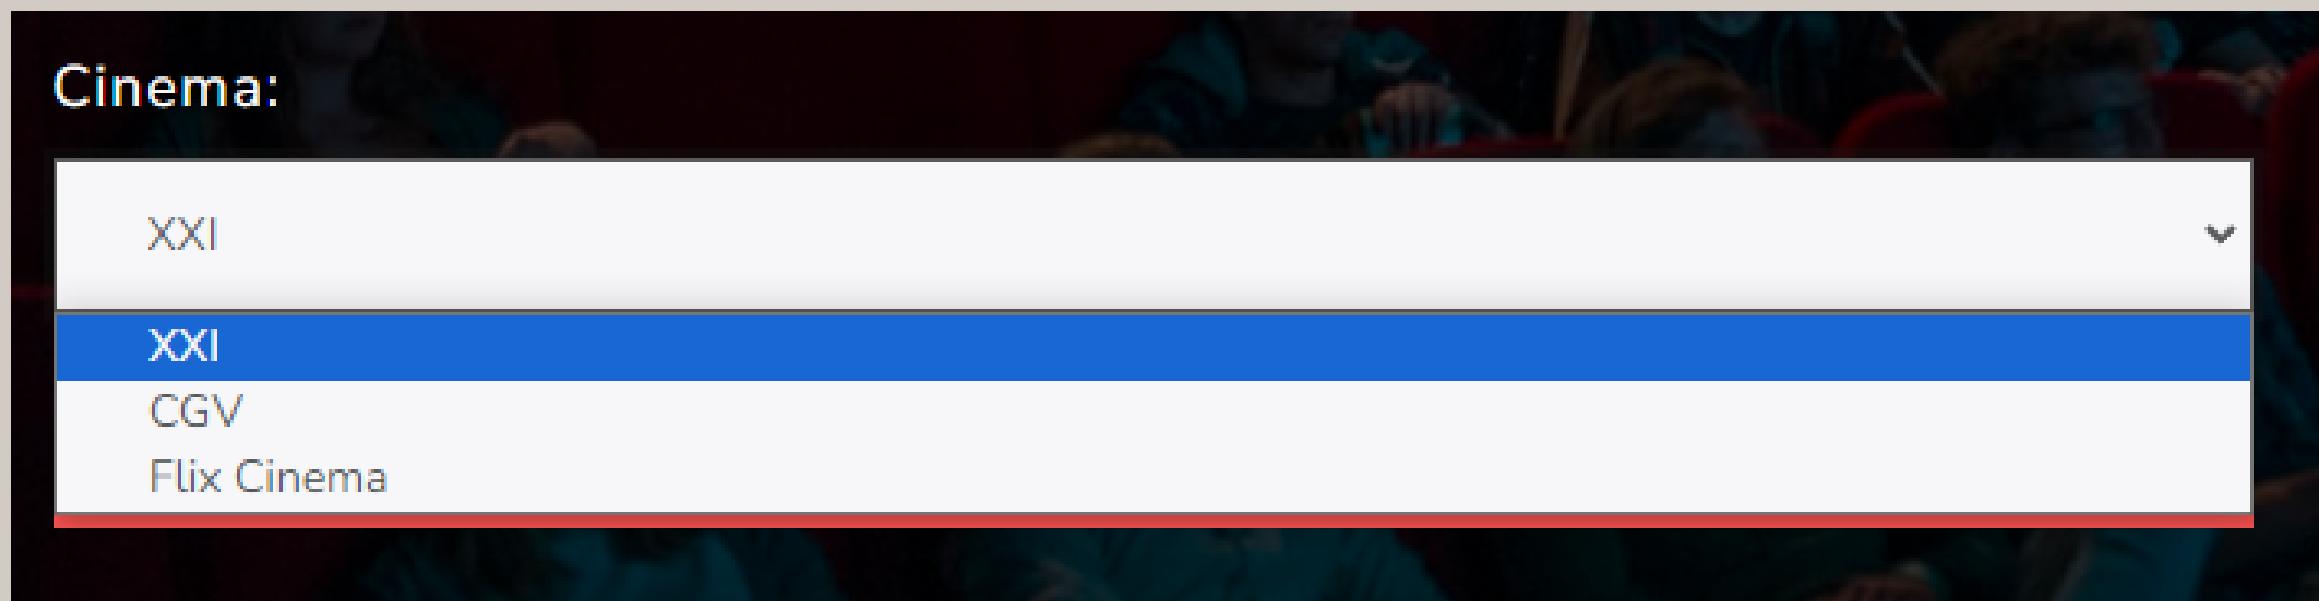

Clear Today

Clicking on the icon would trigger a pop-up calendar.

City and Cinema each consists of dropdown list that provides a range of options for users.

The screenshot shows the Arcadia Ticketing website's landing page. At the top, there is a navigation bar with links for "NOW PLAYING", "UPCOMING", "THEATERS", and "LOG IN". Below the navigation bar, the word "UPCOMING" is centered in a large, bold, black font. Five movie posters are displayed in a row: "Raya and the Last Dragon", "Dune", "Black Widow", "The Suicide Squad", and "No Time to Die". Each poster has its title and release information below it. At the bottom of the page, there is a red rectangular box containing a subscription form. The form has the text "SUBSCRIBE TO GET INFORMED ABOUT OUR LATEST PROMO!" and a field for "Your email address". A "SUBSCRIBE" button is located at the bottom of the form.

At the bottom part of the landing page, just before footer, there is a subscription form where users could submit their email.

- Log In comes in a form of pop-up box using the bootstrap's JavaScript modal plugin.
- Meanwhile, Sign Up is a whole new page that could be accessed by clicking 'Sign up' in the Log In box.
- Any error that occurs during account creation would trigger an error message that vanishes in 3 seconds.

## A personal project

- A web application designed to perform arithmetic calculations.
- Has a responsive web design.
- Languages: HTML, CSS, and JavaScript.
- Toolkit: -
- Frameworks: -

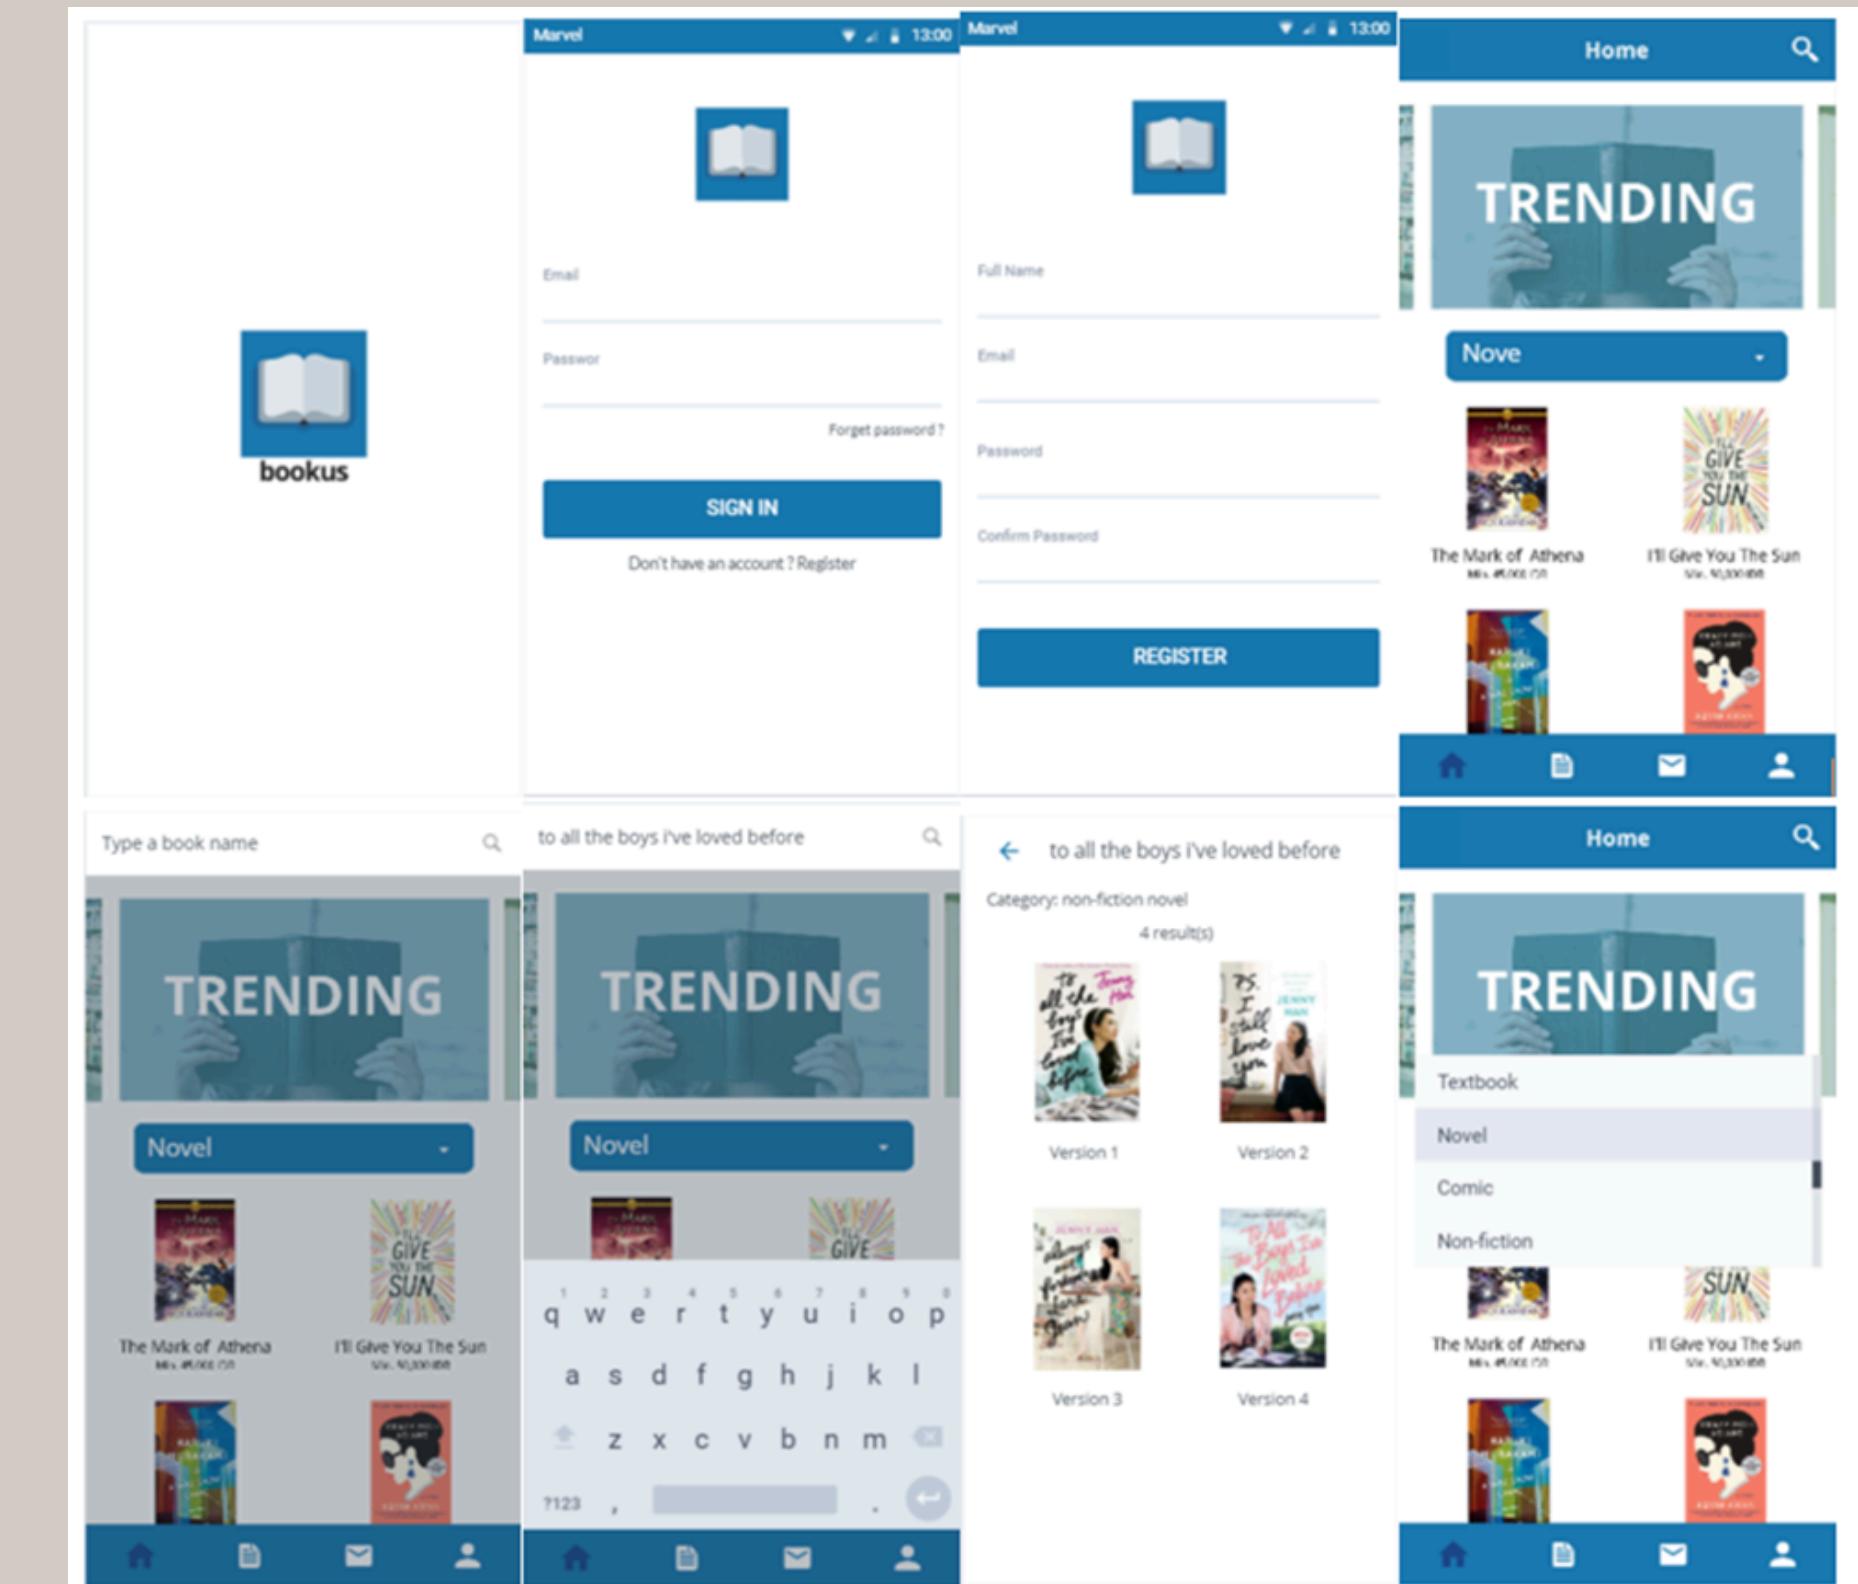

# PROJECT 4 | UI/UX

## A class project

- A UI/UX group project created using Marvel for an Android mobile application named BOOKUS.
- The concept is a marketplace that connects individuals seeking specific books with those selling them.
- Inspired by the decluttering movement, the app promotes a minimalist lifestyle by facilitating the exchange of secondhand books at lower prices compared to retail.
- Users can list books for sale, search for desired titles, and engage in transactions within the app.

- (From left to right) this UI schema is connected to one another, starting from the landing page when users open the app.
- After completing user validation step (either sign in or register), user will be brought to the homepage.
- The main features that decorate the homepage are search bar, carousel that displays the trending books, and a sorting button with options such as textbook, novel, comic, and non-fiction.
- User will be redirected to a ‘search result’ page after entering the book that they are searching.

- Clicking on a book would open a page that displays the book description, a list of sellers and prices they could choose, and a continue button.
- User could determine whether the condition of the book is worth the price given by the seller.
- The last step of this schema is for the user to fill the details of Delivery Address and Payment Method.

- The purchased books could be seen on the Buy tab of Order History page with the complete/ongoing status. Meanwhile, the delivery status of books that the user sells is displayed on Sell tab.
- On Profile page, user could edit their data, add some books to sell, view the books that they're currently selling, and log out.
- When adding a book to sell, user needs to fill all the required data.
- User could also stop selling any particular book by removing them from Product List.
